

EMPIRE MACHINERY

FLUIDS LAB FACILITY

28 X 56

(1568 SQUARE FT)

DISTICTIVE FEATURES:

**SYNTHETIC STUCCO
OSHA LAB REQUIREMENTS
HIGH PROFILE
STOREFRONT RECESSED ENTRY**

Empire machinery presented the challenge of placing an upgraded permanent modular building that would match their existing building, and yet have a finished floor level at the same height as their loading dock.

The solution was to provide this attractive modular facility with a synthetic stucco finish all the way to the ground and to provided a ramp and stair package durable enough to withstand the high traffic, and allow the employees easy access into the main structure.
