

PINAL GILA CHILD SERVICES – MIAMI, ARIZONA
(4400 square ft) Turnkey project installation

Finding a vendor that had headstart experience, and a company that could develop the site were the award criteria on this project. Modular Solutions was able to guide Pinal Gila through the rigorous licensing procedures of the State Health Department. The key element of obtaining zoning approvals was to match the new building with the existing educational facility. This was accomplished with architectural pop outs, parapet wall, and Spanish tile accents. All aspects, including final landscape, were included in our turnkey package.
