

Modular buildings that have served their life cycle and productivity are frequently slated to be smashed and sent to the local landfill. With Governmental agencies searching for ways to gain LEED points for better funding options, Modular Solutions, Ltd. has begun a recycling program. Municipalities that have modular buildings designated to be sent to salvage companies for demolition can work with Modular Solutions, Ltd. and we will retrofit/recycle the buildings back into useful condition.

Schools and churches and businesses that are looking for a company that is environmentally conscious can contact Modular Solutions, Ltd. for a listing of current re-built modular buildings. This program is fairly new, and urges any architects or municipalities considering filling the landfill with “trailer-trash” to let us retrofit the modular buildings into like-new condition and pass the eco-savings onto other clients.

For more information on this program please consult your local branch office, or Modular Solutions, Ltd. corporate office. Modular Solutions, Ltd. has been in the commercial modular industry since 1996 and is pleased to be a GSA federal contract holder. Modular Solutions corporate office can be reached at (800) 441-8577 toll free Nationwide.
